

ESC-Septic

Sludge & Waste Reducer

EnviroServe
corporation

Dedicated to SOLUTIONS in the Drain Maintenance Industry

ESC-Septic is a specially blended formula which is designed to improve and maintain septic tank and cesspool performance. One scoop of this microbial formula contains approximately 300 billion bacterial organisms.

Benefits Include:

- Industrial strength for better results.
- Easy to use! Just flush into toilet once a month.
- Out performs weaker "store-bought" products.
- Helps keep entire system clear and free-flowing.
- Prevents costly field or septic repairs due to build up.
- Helps eliminate unwanted odors and back-ups...permanently!
- Completely safe for people or pets. No chemicals or caustics.

Directions for normally operating systems

Use two scoops every month.

To apply in toilets, simply drop the product in the toilet bowl and flush.

For application in drain, mix with one quart of cool or lukewarm water until fully dissolved and pour down desired drain.

For best results, apply just before bedtime.

Record date and repeat this procedure monthly.

For sluggish systems, double the monthly dose.

Sold in 3 lb. containers
